## moving in

Alfred had it all right where he wanted it... until Barney literally stumbled into his life. Is there a scientific formula for love after all, or is this chemical reaction about to melt down?

### BATHROOM

### BEDROOM

### LIVING ROOM

### KITCHEN

## CONDITIONS

- ✓ The house must contain exactly **10 objects**
- ✓ The house must contain every wall color 
- ✓ The living room  must contain an antique **yellow** lamp 
- ✓ The house must contain an equal number of warm color  features and cool color  features (as **objects** and/or **wall colors**)

*Chemistry might be even more important in a relationship than it is in the lab! Even if Barney drops a beaker, with the perfect number of elements we can make this formula work!*

## CONDITIONS

- ✓ The **bathroom**  must not contain **wall hangings**  nor **curios** 
- ✓ Each room must contain a **lamp**  that is the same **color** as that room's **wall color**
- ✓ The **upstairs**  must contain only **cool colors** 
- ✓ The house must not contain any specific **object** (by type, **color** and style) more than once

*Sorry I'm late, I couldn't find my keys. I put them next to a lamp so I wouldn't forget, but then I forgot which lamp to remember! I think if I had two heads, I wouldn't remember which head was which!*
